AA EXTRA LONG Carhauler Wheel Strap with short handle

SKU#: PCC-26109-ENC
List Price: \$29.95
Our Price: ~~\$24.95~~ **\$22.95**

Additional Product Images

Product Overview

10 ft strap tie down. This auto tie-down strap goes over the wheel and utilizes three rubber tread grabs to prevent slippage. Ships daily from east coast, west coast and mid-west.

Works with most open auto transport trailers. (Not old MILLER with star hole pattern)

\$\$ product qualifies for FREE SHIPPING straight from the manufacturer to any single location in the lower 48 states. Min order quantity: 150 pieces\$\$\$

Product Details

Ratcheting Auto Tie Down Strap - 2" x 10' w/ 3 Tire Cleats, 2 Fixed Wire Hooks & 1 Floating Wire Hook , **Short Handle** Ratchet- 3000 lbs WLL Ratchet handle length 7.5 inch from end of handle to end of hinge

Take a look at the additional pictures and imagine which one of these ratchets you would rather work with! A lot of companies that make auto tie down straps just use the same ratchet handle they use for the assemblies they sell to the flatbed operators.

As you can see from the pictures, you can get all four fingers (with gloves on), but the handle is shorter.

The response to our new and improved line of AA wheel straps has been phenomenal!

Drivers tell us they prefer these because they are easier to work with-- and the extra long strap REALLY saves time when strapping cars down.

Sure, you might be able to find some straps for a buck or two less WE get salesmen from cut-rate strap houses trying to sell us straps just about every WEEK! The prices are pretty good, but when we start asking them hard questions about the working load limit of the straps, the safety factor, the size of the ratchets, the warranty, they usually lose interest in us! Just 'cause a strap is yellow doesn't mean it's the same! (And we can get your straps made in blue, red, green, gray or black!)

If you want a high quality strap, we don't think you can find a better value for durability and ease of use.

Remember: one scratched paint job can cost you dearly. Insist on the AA Extra Long Wheel Strap with Shorter Wide Handle.

Height Stick

SKU#:	AW-MTR4
List Price:	\$240.95
Our Price:	\$199.99 \$149.99

Additional Product Images

Product Overview

Standard

Make sure you always have adequate clearance with these Measuring Sticks. Use them to measure the height of a load or to check the clearance space of a spot you need to pass under. Height markings are at eye level for easy reference, so you'll never have to climb a load to measure it again.

Product Details

The MTR-4 has a foldout horizontal rod that helps your eye adjust the height of the load, allowing you to take an accurate measurement. Made of non-conductive fiberglass, it measures loads from 5' 10' to 15'. Includes plastic storage pouch.

15 FOOT Fiberglass Telescopic Measuring Stick

36X18X18 Semi Rainmaster Drop Open Box

SKU#:	HIP-101-1103
List Price:	\$421.63
Our Price:	\$349.95

Product Overview

FREE SHIPPING IN THE LOWER 48.

These toolboxes have internal design features that make them extra rigid and tough: 1) the larger semi boxes have both a 1/8" "C" channel stiffener bar welded along the bottom front and fully-welded gussets in the sides and corners. (features often ruled out by other manufacturers due to the extra expense); 2) A hefty continuous piano-style stainless steel hinge with a 1/4" pin assures longterm performance; 3) Heavy-duty Hansen? "T-handle" stainless steel locks and mechanisms keep your valuables secure.

Doors that will never sag

The doors of our double-door, side open boxes close into the frame of the box. That means that they are fully supported during the constant jolting of the road. Our single door, drop open boxes have the hinge mounted to the bottom front of the box, which is extra rigid. Vibration and road stress simply can't warp or damage the hinge

Product Details

Free Shipping in the lower 48.

Highway Products Inc., established in 1980, built its reputation on manufacturing the toughest semi truck and trailer underbody boxes on the highway. This unique line of boxes features non-sag doors and is constructed of the thickest grade of aluminum stock utilized in the industry: 1/8" marine grade weather-resistant aluminum.

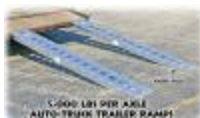

Brackets not included.

94 inch loading ramp single 90 degree Hook Style

SKU#: WDR05-14-094-04-1
Our Price: \$264.99 – INCLUDES SHIPPING!

Additional Product Images

Product Overview

One straight ramp with hook ends, 94 in length, 14 in width, 5000 lb capacity per axle, 8500 lb capacity per vehicle, load height-16"-24"

"05" hook end- 20,000 lb 90 degree heavy duty hook end. Designed to fit over a 1 5/16" bar or angle channel (recommended)

Product Details

We have developed these 6 new ramp models to accommodate some of the most common loading situations. These heavy duty loading ramps were developed for loading cars or trucks onto car trailers, loading skid loaders, large industrial tractors, or for other heavy machinery uses. These are the strongest, lightest heavy duty ramps on the market and are loaded with high quality features not seen in most heavy duty ramps and we are proud to be able to bring them to you at these unheard of low prices. These ramps are kept in stock for quick shipment, however if these sizes do not meet your specific needs, we can custom build these ramps in any length, width or weight capacity you would need for your specific loading situation.

Ramp Features

- Four heavy duty ramp attaching lip choices
 - "04" hook end- 7,000 lb 90 degree hook end Designed to fit over a 1 5/16" bar or angle channel (recommended)
 - "05" hook end- 20,000 lb 90 degree heavy duty hook end. Designed to fit over a 1 5/16" bar or angle channel(recommended)
 - "06"plate end (2500-5000 lb ramps only). Designed to sit on pick-up truck tailgates (PVC rubber strip bonded to underside of 6" plate. Includes (2) ramp safety straps
 - "02" pin on ends. 20,000 lb. tubes that pins into a required skid seat ramp attaching bracket that is available in steel or aluminum.
- Extra wide plate style serrated cross bars offer maximum traction in the rain, mud or snow. Stronger than the traditional "rung" design.
- Constructed of lightweight T6 aircraft grade aluminum for superior durability and strength
- Ramps are rated per axle (see maximum vehicle capacities below). Safe for loading 4 wheel equipment, vehicles and commercial equipment.
- Low profile design allows ramps to slid into storage brackets under truck or trailer
- Strongest, lightest ramps on the market Guaranteed!
- Easily loads cars, trucks, skid loaders, tractors and other heavy machinery
- 5 Year Manufacturer Warranty
- **IMPORTANT CONSIDERATIONS WHEN ORDERING LOADING RAMPS:** Where are you going to store the ramps? Ramps with part number beginning "L" have a standard profile of 2.25 X 18 inches. If your trailer has a place to store the ramps under the deck, you need to make some careful measurements of the inside dimensions of this receiver box. The standard profile ramps work best with a receiver box that is **at least** an additional half inch wider and higher than the ramp that will be going into it. Slight distortions in the frame of this internal storage frame can cause binding. For instance, impact with a sidewalk curb with sufficient

force can deform the receiver frame just enough to cause binding with longer ramp lengths. (If you only have a quarter inch of room on either side of the ramp, as you slide an eight foot ramp into a deformed box, it isn't hard to run out of space at these close tolerances) If you have a damaged receiver box, you may need to repair it. Please note that custom loading ramp thicknesses and widths are available. Call 866-855-4285 for more information.

Aluminum Replacement Hydraulic Cylinders

Cottrell Style 2" bore, hollow rod, 90 deg. ports, Hydraulic Cylinder –
\$122.11 base price + 2.65 per inch of stroke
2 inch bore X aluminium tube hydraulic cylinder with hollow chromed rod.
Hydraulic ports are offset 90 degrees from the cylinder pin holes [More Info](#)

Call
to
order

Boydston Style 2" bore, 1.25" solid rod, 90 deg. ports, Hydraulic Cylinder -
\$113.05 base price + 1.89 per inch of stroke
2 inch bore X aluminium tube hydraulic cylinder with 1.25 inch dia. Solid
chromed rod. Hydraulic ports are offset 90 degrees from the cylinder pin holes

Call
to
order

Notes on ordering aluminum hydraulic cylinders:

Measure the fully collapsed length from center of pin hole to center of pin hole.
Make SURE you know what the bore is (inside diameter).

Where are the ports? Is there one on the top and one on the bottom? Is the bottom port offset 90 degrees or directly above the bottom pin mount. Returns are very costly, and you will be charged a 50% restocking fee plus shipping.

Most of the cylinders we sell are between 2-300 dollars, depending on stroke and bore, so you can save money replacing cylinders... but ONLY if you buy the right one.
